

Results of the International Students Olympiad in Hot Bulk Forging Technologies 2017

The International Students Olympiad in Hot Bulk Forging Technologies was arranged by 17 Organizers in 13 countries. 103 participants from 39 metal forming departments took part in the event on 22 - 28 April, 2017. Since this year students could choose alternative task for developing technological process of hollow aluminium profile extrusion.

Final Results of the International Students Olympiad in Hot Bulk Forging Technologies 2017				
Member of the International Committee	1 st place	2 nd place	3 rd place	Total points
Igor Markechko OmsTU (Russia)				Tatiana Borunova Russia 66
Janusz Majta AGH University (Poland)				Nguyen Trung Thuc Vietnam
Markus Bambach BTU Cottbus-Senftenberg (Germany)				Blagoja Nestorovski Macedonia 44
Mathias Liewald University of Stuttgart (Germany)				Blagovest Nikolov Zlatev Bulgaria 24
Yuri Gladkov Bauman MSTU (Russia)				Szymon Latoń Poland Cabel Georgian Constantin Romania
R. C. Prasad Pillai College of Engineering (India)				Zang Qiqi China 22
Valentin Kamburov Technical University of Sofia (Bulgaria)				Ngo Ngoc Vu Taiwan 12
Kuang-Jau Fann National Chung Hsing University (Taiwan)				Max Adner Germany 6
Sergey Stebnov QuantorForm Ltd. (Russia)				
Yeong-Maw Hwang National Sun Yat-sen University (Taiwan)				
Seokmoo Hong Kongju National University (Korea)				
Nicolae Serban University Politehnica of Bucharest (Romania)				

Facts:
103 participants
39 universities
17 organizers
13 countries
12 committee members

Welcome to the Olympiad 2018!

Aluminium Two Thousand Congress & ICEB 2017

New version of QForm Extrusion was shown at the Aluminium Two Thousand Congress & ICEB 2017 which took place on 20-24 June 2017 in Verona, Italy.

As always QForm has shown good correspondence to the experimental results and QForm software is still the fastest in the market.

At Aluminium Two Thousand Congress the paper «Quality Prediction and Improvement of Extruded Profiles by Means of Simulation» was presented by Nikolay Biba (Micas Simulations Ltd., UK).

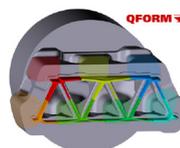

ASAŞ

Founded in Gebze in 1990, ASAŞ is the biggest aluminium extrusion enterprise in Turkey with production facilities located in a total of 640.000 m² area.

Prior to manufacturing the die and extrusion ASAŞ analyze each profile extrusion process using QForm software to predict and eliminate defects and problem areas that can occur during real extrusion.

Using QForm software ASAŞ have achieved a successful extrusion development process with no trials required. This allows ASAŞ to produce even the most complicated profiles very quickly with a uniformly high level of production quality.

EVENTS

27 – 28 June 2017
QForm Users Meeting
and Seminar
in Turin, Italy

7 July 2017
ADA Users Conference
in Tokyo, Japan

11 – 14 September 2017
20th International
Forgemasters Meeting
in Graz, Austria

14 – 17 November 2017
Metal-Expo'2017,
the 23rd International
Industrial Exhibition
in Hall 75, VDNkHa
Moscow, Russia
Our booth is 1B78

27 – 29 November 2017
QForm Forum 2017
in Berlin, Germany

Aluminium Valley in Business Trade Show 2017

Aluminium Valley in Business Trade Show 2017 took place in University of Quebec at Chicoutimi on 23-24 May.

QForm metal forming simulation software was presented during the event by our representative in Canada Metal Forming Analysis Corporation (MFAC).

QForm Seminar in Rajkot, India

Seminar dedicated to QForm VX, organized by Digital Design Solutions Company (QForm representative in India) took place on 30 May 2017.

During the event Mr. Paul Mordvintsev introduced QForm VX 8.2 version as well as participants discussed about new possibilities of surface flow defects prediction «Gartfield», crankshaft forging and ring rolling processes simulation.

Workshop on Application of Simulation & Failure analysis in Product Development

The Society for Failure Analysis Mumbai Chapter, PCE Panvel, PHCET Rasayani and QForm Software jointly organized a one day Workshop titled «Application of Simulation & Failure Analysis in Product Development» on 1 June 2017.

Mr. Paul Mordvintsev invited by Prof. R. C. Prasad made a presentation «Introduction and Application of QForm Software for Development of New Product with Improved Quality at Reduced Cost and Time in Manufacturing Processes».

QForm VX 8.2 seminar in Beijing, China

Seminar dedicated to QForm VX 8.2 new version took place on 15-16 June 2017 in Beijing, China.

Hanlong Liu (Beijing Intelligent United Innovation Technology Co. Ltd, QForm representative in China) and Ivan Lishniy (Business development manager, QFX Simulations Ltd.) presented to seminar participants QForm new features and possibilities in simulation of metal forming.

Forging Symposium 2017 in Seoul, Korea

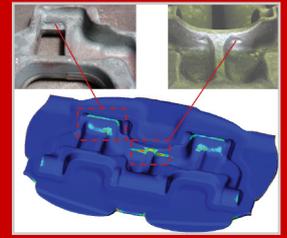

Forging Symposium 2017 took place on 15 June 2017 in Seoul, Korea.

Mr. Soontak Kho (CAE Technology Inc., QForm representative in Korea) made a presentation «Newest Technology of Forging Simulation Software».

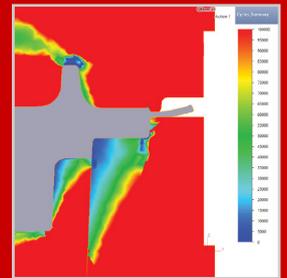

www.qform3d.com

QForm New Features

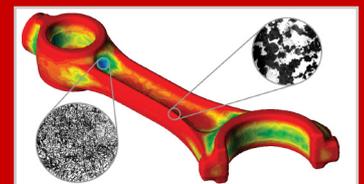

Gartfield - prediction of surface material flow defects

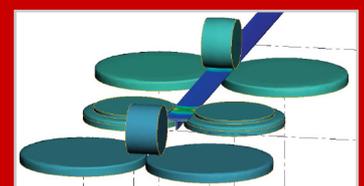

Tool fatigue standard subroutine

Automatic technical reports

Heat treatment module

Rolling module

Electric upsetting module
