

QFORM OLYMPIAD

International Students' Olympiad on Metal Forming Processes

The prize fund is amounted to 5000 euro

14 countries, 40 leading universities in the world

QForm Academic license and training materials

More information:

THE SCIENTIFIC COMMITTEE

The Scientific Committee of the Olympiad consists of professors, researchers and industrial representatives from Germany, Poland, Hungary, Russia, Italy, Serbia, Romania, Vietnam, China.

PREPARATION

To prepare, we provide reports from past winners and conduct free training courses on simulation. For universities we provide Academic license for three months.

AWARDING

The award ceremony can be organized at the university, we transfer the prizes to the organizers, or the QForm team invites the winners to participate in conferences, forums or other professional events and awards them during the event. Winners receive diplomas, souvenirs and cash prizes.

QFORM ACADEMIC LICENSE

Universities taking part in the Olympiad could get a free 3-month QForm academic license to practice before the Olympiad by request. Students could get free QForm Cloud Academic license to use it from home.

The Olympiad consists of three sections:

1. Hot Bulk Forging
2. Extrusion
3. Shape rolling

Deadlines:

- **January:**

Organizational Committee membership confirmation letter (including contact person details) to market@qform3d.com

- **February:**

Competition entry from universities (including request for QForm license if needed)

- **March:**

List with applicant students

The prize fund is amounted to 5000 euro

MISSION

Student Olympiad is our contribution to the education progress. The aim of the Olympiad is to build a professional community, to create a strong relationship between educational institutions and production companies. We are trying to motivate students to study modern simulation and manufacturing technologies. Students get an opportunity to build their professional portfolio, and companies get an opportunity to find talented and perspective specialists.

Since 2014, our team has been organizing the International Student Olympiad. We have involved more than 14 countries, more than 40 universities and about 150 participants every year.
